

SmartCup

**REVOLUTION
CUBE**

**SUSTAINABLE EFFICIENCY WITH
THE LITTLE BIG SMARTCUP!**

SmartCup

A machine for thermoforming/filling/sealing that marks a radical departure from traditional food packaging methods.

- **Flexibility in format changes**

Change diameter and height format in 1 hour.

- **Manage materials changes in real time**

Option to maintain the same size but change the material, in real time.

- **100% sustainability and saving**

No waste in the production process, to totally protect the environment and make real savings in cost terms.

- **Constant rotary motion**

SmartCup's revolutionary non-linear design means forming thermoforming processes and times can be optimised.

- **Other important features:**

- Compact size, up to 20% smaller than competitors.

- No blades or dies, making it easy to maintain.

- All the main advantages of FFS and FS technology in just one machine, to optimise space and costs and for the utmost hygiene.

- Easy access to each packing line station.
